DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/17/04 has been entered.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 11 recites the limitation "<u>the</u> formats and frame rates" in line 7. There is insufficient antecedent basis for this limitation in the claim.

Claim 12 recites the limitation "<u>said</u> independently packetized streams " in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 13 recites the limitation "...de-packetized at it's different frame rate in <u>a display</u> <u>device</u>". It is appears that this display device is not same as "a display device" defined previously in claim 11. According to the specification, the packetized video streams are

Art Unit: 2611

transmitted to a particular display device and the video streams are de-packetized only in that paricular display device. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 5. Claims 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Gordon et al. (US 6,651,252 B1).

Regarding claim 11, Gordon discloses a system (202 - see figures 2 and 4) comprising:

- a processor (400 & 402 see figure 4);
- a storage (212, 214 & 232 see figure 4) coupled to said processor;
- a video controller (404 see figure 4) coupled to said processor; and
- a packetization device (408 & 416 see figure 4) coupled to said video controller to independently packetize at least two heterogeneous video streams for transmission thereof to a display device (transmitting a multiple video portions that are packetized to display a subscriber equipment 206 see figure 2; col. 3, lines 59-66; col. 5, lines 21-23; col. 9., lines 2-15) without converting the formats and frame rates of said at least two heterogeneous video streams to a common output format and rate (it is noted that these video portions are independently packetized without changing their formats and rates to common output format and rate. Each of

Art Unit: 2611

the video portions may contain video having different rates of motion, e.g., portion one may run at 30 frames per second, portions two and three may run at 2 frames per second – see col. 8, lines 49-60; col. 10, lines 10-16).

Regarding claim **12**, Gordon discloses a modulation device (via cable modem 222) for modulating and transporting the packetized video portions to LNE (see col. 5, lines 32-42; figure 2).

Regarding claim **13**, Gordon discloses that each of the video portions may contain video having different rates of motion, e.g., portion one may run at 30 frames per second, portions two and three may run at 2 frames per second (see col. 10, lines 10-16; col. 13, lines 44-47). That is each of video portions is packetized and de-packetized at it's different frame rate in the subscriber equipment.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ngoc K. Vu whose telephone number is 703-306-5976. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Grant can be reached on 703-305-4755. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
